Headline "Toxic environment and extreme paranoia"

Pro's "Beautiful offices and great salary. Downtown location."

Con's "Extreme paranoia, very stressful, no policies or structure. Upper management rules by intimidation. Very high turnover. No communication. They won't do performance appraisals because that would mean putting something in writing - back to the paranoia. Horrible place to work. Privately owned - saturated with family members. Forget about positive feedback - you only hear negative, sometimes delivered loudly and angrily. No culture, no values."

Advice "Treat treat staff better. These talented people work hard and care about their contributions. Instead you treat them like trained monkeys. Staff deserve recognition, the chance for advancement and added responsibilities. Get a grip on the paranoia."
